

Colourfence
the perfect backdrop for your garden

Colourfence - fencing to be proud of

because your home dese

It's only natural to want your home looking its best. When making your home a pleasant place to enjoy with family and friends, maintaining a timber fence can be an unwanted annual distraction.

That's where Colourfence will help, enhancing your property and providing an elegant frame for your garden with minimum effort.

Requiring no maintenance, Colourfence will retain its finish for years to come, making your boundaries look better for longer.

Timber fences never age gracefully, even with regular staining.

As Colourfence is made from innovative Colorbond steel, we guarantee your fence will remain unspoiled for at least twenty five years.

However, it's likely to look stylish for far longer.

Would a timber fence even be standing after twenty five years facing the elements?

Looking good for longer

Designed to withstand harsh climates, Colourfence not only holds its colour for over twenty five years, it acts as a solid barrier, even against 130mph winds. Yet the only maintenance your fence requires is an occasional hose down with water. In fact, you'll find the rain often does the job for you. You simply don't have to do anything else.

There's no need to nail and paint, and because Colorbond steel features a 'Zincalume' layer, an outstanding anti-corrosion technology, even scratches won't rust. This special coating heals abrasions by forming a waterproof combination of zinc and aluminium oxides.

The metal panels are also fully recyclable. Free from toxic chemicals required to maintain them, Colourfence is better for the environment than treated timber.

Securing your privacy

Colourfence promises more than lasting good looks. With no footholds and a smooth finish, you can relax knowing this tough barrier will deter intruders and help maintain your privacy.

erves more...

With appropriate planning consents, we can even provide you with panels over two metres high, helping you convert your garden into a tranquil and private retreat.

Make it your own

Choose Colourfence and you don't just benefit from a new boundary for your property. You transform your outside space with a clean and stylish finish. There's a choice of colours too. So, complement your garden with traditional Evergreen and Brown, or brighten up your patio with contemporary Bluestone and Cream.

Alternatively, you can mix and match colours for a fence as individual as you are. You can even choose the colour of decorative trellis, or whether to have one at all.

Whatever the shape of your garden, we can step, rake or cut Colourfence to any size, allowing your boundary to follow the natural contours of your land.

Our service promise to you

Whether you're inviting us to your home for a survey or arranging installation, we promise to be punctual, polite and professional.

Our prices are fair, fixed and published on our web site, so there's no need to negotiate and we'll never coerce

you into buying. In fact, we'll only install if we feel sure Colourfence will be a credit to your property and our company.

Trained, reputable and conscientious Colourfence teams will install your fencing to your complete satisfaction.

Free, no-obligation advice

You can also receive free no-obligation advice by calling our head office or your local Colourfence installer.

Whoever you call, you can feel confident you will receive the same professional service and commitment to meeting your needs.

Furthermore, you'll find Colourfence costs less than you might think.

While you may find cheaper timber fencing, Colourfence is consistently better value. That's because, whatever the quality of timber, it simply cannot outlast Colourfence.

What's more, with Colourfence there's no maintenance.

Just year after year of stylish, solid protection.

ColourRail

Designed to compliment Colourfence, these tubular steel railings are ideal for situations where full screening isn't required, such as front gardens.

ColourRail can be free standing, mounted between posts or on top of walls, helping to enhance and improve your property.

Available in a loop, loop and spear or all spear finish and manufactured from galvanised steel, ColourRail is finished in the same colours as Colourfence, plus a traditional gloss black.

There's even a range of garden and driveway gates available which will look equally at home with your Colourfence and ColourRail, or you can use them on their own.

ColourRail is an economic and attractive alternative to wrought or cast iron, and because it's guaranteed not to corrode or flake for ten years, it is another maintenance free product you can fit and enjoy.

How Colorbond steel stays stunning over 25 years

Select Colourfence and you protect your property with one of the world's most advanced steel products. Beneath the steel's surface, market-leading technology guarantees long life and good looks. Testing 17,000 samples annually at exposure sites around the world ensures Colorbond steel can withstand extremely harsh climates. So, backed by one of Australia's biggest companies, BlueScope Steel, our twenty five year guarantee really means something.

Colorbond, Zincalume and BlueScope are registered trade marks of BlueScope Steel Limited.

The Colourfence colours shown in this leaflet have been reproduced to represent product colours as accurately as possible. However, we recommend checking your chosen colour against an actual sample of the product before purchasing, as varying light conditions and limitations of the printing process can affect colour tones.
