## Why ColourFence?

### Probably the most cost-effective Fence you can buy.

From as little as £56 per metre+.

**Unlike Other Brands**
**ColourFence Includes Posts, Rails and Post Caps Within Our Panel Price**

**Maintenance Free Forever**: What does this mean?

We believe ColourFence is the best domestic fencing system in the world today. We don't believe that customers should spend their hard-earned money on inferior products like wood, plastic, or composites that will eventually rot, break down, fade, or distort in the weather. Meaning you don't need to stain, paint, repair, your fence, allowing you to spend more time enjoying your garden.

It doesn't need to dominate your garden either; you can grow plants against or all over it, with the peace of mind that you will never have to cut your beautiful plants down to access your fence.

**Guaranteed For A Minimum of 25 Years**: What does this mean?

**Saving you money.** Unlike our competitors you will not need to maintain or replace your fence for at least 25 years.

ColourFence won't warp, crack, shrink, rot, peel, break, or require staining or painting for at least 25 years, although we know it will last many more. Again, allowing you to spend more time enjoying your garden.

Our guarantee provides peace of mind with a sustainable, weather-resistant, fireproof product that effortlessly combines beauty and durability, transforming your garden into something stunning and reliable.

**Withstands Gusts Up To 130mph**: What does this mean?

Now we're experiencing climate change - severe winds and storms are becoming more common in many parts of the world and the UK is no exception. Wooden fencing products are often vulnerable to damage from these extreme weather conditions, leaving homes and gardens exposed to potential risks.

However, ColourFence is designed to withstand the harshest UK and continental weather conditions. Offering unparalleled durability and strength, making it a perfect solution for the increasing threat of severe weather conditions.

**Fire Proof**: What does this mean?

For yours and your family's safety ColourFence products are also fire proof, providing another layer of protection to your home. Unlike many of our competitors products, flames from wooden or composite fencing can spread into your home, garden and neighbours' property causing fire, smoke and hazardous fumes.

**100% Recyclable Materials**: What does this mean?

Steel, being infinitely recyclable, also aligns with modern environmental standards. This makes ColourFence not only a practical choice for homeowners but also a responsible one. The developers at Climar took pride in creating a product that would reduce waste and environmental impact, all while providing a superior fencing solution.

## Why ColourFence?

### Operating For Over 21 Years in the UK.

Over 100,000 Fences Installed in Residential Properties

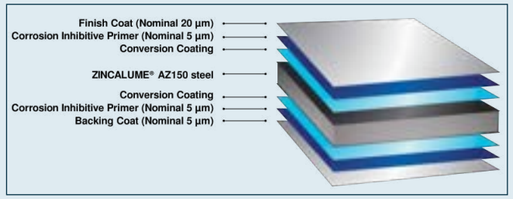

Here in the UK, fences certainly face some challenging weather conditions from extremes of heat and cold, to dust, rain, wind and hail.

COLORBOND® steel undergoes corrosion testing, durability testing, application testing (to ensure it can be used in a wide range of manufacturing applications) and outdoor exposure testing.

**COLORBOND® steel is far more than just 'paint on steel'.**
The base is coated in industry leading metallic coating to provide enhanced corrosion resistance.
A thin pretreatment layer is applied to optimise the adhesion of further coatings.
A corrosion inhibitive primer is baked onto the surface.
A topcoat of specially developed, exterior grade paint is baked on to provide resistance to chipping, flaking and blistering and to ensure the finish retains its look for longer.

**The Fence That Repairs Itself**
Even under the striking colour finish, the unique Colorbond® has a 'Zincalume' layer.
Zincalume is an outstanding, anti-corrosion technology, meaning scratches won't rust! When scratched, the ColourFence forms a waterproof layer made up of a combination of zinc and aluminium oxides. So even when chipped or damaged during its life in your garden, you won't see any rust!

**Heights Available**
0.9m or 3ft | 1.2m or 4ft | 1.5m or 5ft | 1.8m or 6ft | 2.0m or 6.5ft | 2.1m or 6.8ft

**Widths Available**

## Why ColourFence Gate?

### Strong, Secure and Built To Last

**These lockable gates are made from the same COLORBOND® material as our ColourFence products. Meaning you get the same benefits for your gate as your ColourFence.**

ColourFence Gate offers a unique combination of practicality and aesthetics. With its robust and durable construction, it provides an unparalleled level of security and protection for your garden while requiring no maintenance.

**Maintenance Free Forever:** What does this mean?

We believe ColourFence is the best domestic fencing system in the world today. We don't believe that customers should spend their hard-earned money on inferior products like wood, plastic, or composites that will eventually rot, break down, fade, or distort in the weather. Meaning you don't need to stain, paint, repair, your fence, allowing you to spend more time enjoying your garden.

It doesn't need to dominate your garden either; you can grow plants against or all over it, with the peace of mind that you will never have to cut your beautiful plants down to access your fence.

### What Designs and Colours Are Available For ColourFence Gate:

There are five stylish colours to choose from and you can even mix and match components to create your very own look and style. You can even pick a matching or contrasting design from Traditional Plain or Trellis to Contemporary Trellis designs. So, whether you prefer the traditional look of Green or Brown plain fence gate, or a Grey contemporary trellis gate, there is a ColourFence Gate as individual as you.

### What Comes With A ColourFence Gate:

**ColourFence Gate comes with an elgate lock, a handle and pair of hinges as a standard.** However, you can choose to upgrade your elgate lock to either a magnetic latch or deluxe lock for additional peace of mind and security to your home.

## Why ColourFence Deluxe Gate?

### Strong, Secure and Built To Last

**ColourFence Deluxe Gate are made from the same COLORBOND® material as our ColourFence products. Meaning you get the same benefits for your gate as your ColourFence.**

These gates are custom-built to size and are often chosen by our customers as the next level up from a standard gate. ColourFence Deluxe Gates are solid panel gates, which offer an even higher level of security and safety to your home, as well as an aesthetic finish which is unrivalled.

**Maintenance Free Forever**: What does this mean?

We believe ColourFence is the best domestic fencing system in the world today. ## Why ColourRail?

### The Maintenance Free Alternative To Iron Railings

**ColourRail is the perfect addition to the front of your home, without obstructing your view or light coming into your home.**

**Maintenance Free Forever**: What does this mean?

We believe ColourRail is the best domestic railing system in the world today. We don't believe that customers should spend their hard-earned money on inferior products like wrought iron that will eventually rust or corrode in the weather. Meaning you don't need to stain, paint, repair, your railing, allowing you to spend more time enjoying your garden.

**Guaranteed For A Minimum of 25 Years**: What does this mean?

**Saving you money.** Unlike our competitors you will not need to maintain or replace your ColourRail for at least 25 years.

ColourRail won't rust or corrode, or require staining or painting for at least 25 years, although we know it will last a lot longer. Allowing you to spend more time enjoying your garden. Our guarantee provides peace of mind with a sustainable, weather-resistant, fireproof product that effortlessly combines beauty and durability, transforming your garden into something stunning and reliable.

**Fire Proof**: What does this mean?

For yours and your family's safety ColourRail products are also fire proof, providing another layer of protection to your home. Unlike many of our competitors products, flames from wooden or composite fencing can spread into your home, garden and neighbours' property causing fire, smoke and hazardous fumes.

### ColourRail In Detail:

ColourRail is a superb railing solution made with the highest quality 16mm galvanized steel tube, and a sturdy 25x38mm frame. Our railings can be mounted freestanding using the appropriate posts, between existing pillars or on top of walls depending on your garden.

ColourRail is spray coated with our high-quality Azko Nobel architectural grade powder coat. Meaning you can choose 7 standard colours or over 300+ bespoke RAL colours, while maintaining the same structurally sound railing solution for over 25 years. Or choose our no powder coated, or galvanised, option for our budget range.

## Why ColourShed?

### The Maintenance Free Practical Storage Solution

**As ColourFence has gained in popularity, our customers have been keen to extend the benefits to the rest of their garden.**

**Maintenance Free Forever:** What does this mean?

We believe that customers should not have to spend their hard-earned money on inferior products like wood, plastic, or composites that will eventually rot, break down, fade, or distort in the weather. Meaning you don't need to stain, paint, repair, your fence, allowing you to spend more time enjoying your garden.

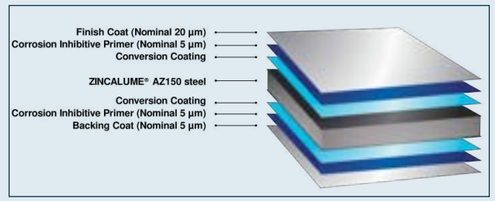

COLORBOND® steel undergoes corrosion testing, durability testing, application testing (to ensure it can be used in a wide range of manufacturing applications) and outdoor exposure testing.

**COLORBOND® steel is far more than just 'paint on steel'.**
The base is coated in industry leading metallic coating to provide enhanced corrosion resistance.
A thin pretreatment layer is applied to optimise the adhesion of further coatings.
A corrosion inhibitive primer is baked onto the surface.
A topcoat of specially developed, exterior grade paint is baked on to provide resistance to chipping, flaking and blistering and to ensure the finish retains its look for longer.

### The Fence That Repairs Itself

Even under the striking colour finish, the unique Colorbond® has a 'Zincalume' layer. Zincalume is an outstanding, anti-corrosion technology, meaning scratches won't rust! When scratched, the ColourShed forms a waterproof layer made up of a combination of zinc and aluminium oxides. So even when chipped or damaged during its life in your garden, you won't see any rust!

# Testimonials

‘Great job done by a friendly and helpful team. Reasonable pricing and good general customer support throughout the ordering etc process. They went to a lot of trouble not to inconvenience us. The product looks really stylish, is robust and we were able to have any colour of our choice from the RAL chart. Amazing!’

‘The new metal fence has completely transformed our garden while improving its kerb appeal. Someone walked past yesterday and I heard them say “It looks really nice, doesn’t it?” It does and we’re delighted.’

‘Brilliant product and excellent staff. My whole garden is now beautifully furnished with this garden fencing! No more painting for me and no more worries about windy weather. So pleased!’’

‘Excellent product and service. Professional from start to finish. Product is very good quality, really pleased with how it looked. The team had a difficult job, as my garden is on a banking, I’m really pleased with the result. Would highly recommend the company and the product.’

‘Absolutely love our new brown metal fence. It enhances the end of our garden and also makes it very secure. No more painting and propping up the old wooden fence with a gate that didn’t close.’
